Target version:			**Spent time:**	0.00 hour
revision:	r0			

Description

We need to clarify a bit more the steps/ actions that the code will follow.

By example there is a small list of what I noted:

- Inputs
    - Distribution functions
    - B, E *$ k$ and/or $ \omega $ ranges
- Calculations
    - Matrix calculation (via numerical or analytic integrations, and so on)
    - Solve the root of the relation discpertion
- OutPut:
    - Plot ?
    - text/bin file ?
    - interactive GUI ?
