revision:	r0		

Description

Rappel de la règle :

Don_Enumeration

Definition:

Numbers, characters and strings have to be declared as constants instead of being used as literals inside a program. The user can list the allowed literal constants.

Parameters:

A list of character strings representing the allowed literal constants.

Note: In the case of constants used in initializing lists

(concerning array and struct structures), only the first five violations are shown.

Justification:

Makes maintenance easier by avoiding the scattering of constants among the code, often with the same value.

Example:

```
// do not write
```

```
char tab100;
```

```
int i;
```

La règle n'est pas respectée dans 296 cas d'après Logiscope:

History

#1 - 03/10/2018 05:29 PM - William Recart

Je propose que ceci ne soit pas modifié et rentre dans le cadre de la RFW existante : RPW-MEB-LFR-RFW-00256-LPP

#2 - 04/10/2018 11:44 AM - bruno katra

- Status changed from New to In Progress

Je suis d'accord : ca rentre dans le contexte de la RFW 256 déjà acceptée.

#3 - 10/10/2018 10:56 AM - Alexis Jeandet

- Parent task set to #3120

#4 - 10/12/2018 03:47 PM - William Recart

- Status changed from In Progress to Closed

Corrected in source code V3.2.0.24
