User story # 3335: Re-enable data cache	**New**

History

#1 - 19/02/2019 09:59 AM - Alexis Jeandet

A user should be able to write his own Python scripts to build variables.

This implies to:

- write a data provider Python interface.
- document this interface
- provide some examples

This will allow to:

- build custom products
- add other web services easily
- load any local file easily
