

JUICE-SCM/Ground Segment - Task #4089

Task # 4024 (New): Première version calibration python

ConfigHandler modularity implementation

16/05/2023 04:08 PM - Theo Stassen

Status:	In Progress	Start date:	11/05/2023
Priority:	Normal	Due date:	17/05/2023
Assignee:	Theo Stassen	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
revision:	r0		
Description			
Need to			
- Get global Attributes			
- Check cdf name			
- Structure efficiently and extract correctly Default / Current / Limits config file content			
- Make class for deduce parameter values, depending on other parameters			
Subtasks:			
Task # 4091: Global attributes and cdf name gestion			Resolved
Task # 4092: default / current / limits config gestion			Resolved
Task # 4093: Make class for deduce parameter values, depending on other parameters			Resolved
