Target version:		Spent time:	0.00 hour
revision:	r0		

Description

Implied computation, and precise plot of a lot of elements

~~Implied resolve problems with epoch handle (epochs was different from IDL, and different between waveform and spectra plots), in following task,~~

During this epoch problem resolution task, realize that waveform was not correctly cut in batch for quicklook,

~~> when done it raises plotting problems (in modes where there are data holes) -> needs to handle differently the data holes~~

> now all works beautifully
