

JUICE-SCM/Ground Segment - Task #4172

Adapt the calibration / evaluation code to allow JUICE files

18/09/2023 02:07 PM - Theo Stassen

Status:	Resolved	Start date:	13/09/2023
Priority:	Normal	Due date:	15/09/2023
Assignee:	Theo Stassen	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
revision:	r0		
Description			
<p>-Done during sweden week. As the Juice files has some differences with MMS files, lot of little adaptations needed. -Debug of the incorrect epoch array computation (from the David Pisa code) -> now the data handle/quicklook of juice files is correct -We can run the calibration code for Juice files, for now the calibration function list is empty. -We can quicklook Juice files correctly (but need comparison with matlab code)</p>
