Description			
<p>Now the tkinter GUI can be used to select a time_limits or a single file, to select a SID, to select what content to plot and to select a first optional parameters (fft np, more to come)</p> <p>This GUI is way more easy, clear and smooth than the interact interface using matplotlib natively inside to core of the code.</p> <p>It is now a pleasant tool, in which we can add any functionalities we want.</p>
