Description			
1. Test SVS-0006, SVS-0097... in SVS but not in SValR 2. Test SVS-0014, SVS-0024 in SValR but not in SVS			
TODO :			
Modifs à faire dans SValR et SVS :			
Test SVS-0014 in SValR but not in SVS : Indeed it appears that template for SVS test cases have an auto-increment macro enabled so when we deleted a test case during documents writing it has shifted several SVS number making SVS-0014 become SVS-0013. It is now fixed and SVS-0014 is back. It will be available in the next release of the document. FAIT			
Test SVS-0024 in SValR but not in SVS: I can see SVS-0024 at page 46 of the pdf. RIEN A FAIRE			
- Test SVS-0006 in SVS but not in SValR : Yes, maybe SVS-0006 test case should have been deleted from SVS because it is covered now by others test cases (see comments) : SVS-0059 and 0085. But we kept it in SVS for traceability/history reasons... Maybe a little bit awkward, it will be removed from next releases.			
- Test SVS-0097 in SVS but not in SValR : Yes indeed, we forgot a requirement in SValR for R2 : SSS-CP-FS-120/REQ-LFR-SRS-5212 which is validated by SVS-0097. It will be fixed in a new release. However, feature has been tested and is OK.			

History

#1 - 19/11/2015 05:02 PM - bruno katra

- Description updated

#2 - 19/11/2015 05:03 PM - bruno katra

- Description updated

- Priority changed from Normal to High

#3 - 03/03/2016 05:01 PM - bruno katra

Done in SValR 1.1 and SVS 1.5

#4 - 03/03/2016 05:01 PM - bruno katra

- Status changed from In Progress to Closed

- % Done changed from 50 to 100
