

## Adding an OwnCloud agenda to your favorite client

### Nautilus (Gnome)

This is the easiest, Gnome has a support for [online accounts](#) so adding your OwnCloud agendas is as simple as just entering your login in setting panel.

1. Go into Gnome settings then online accounts:
2. Add a new OwnCloud or NextCloud account:
3. Fill in the following order the NextCloud/OwnCloud account setting:
  1. **Server** should be **ao.lpp.polytechnique.fr**
  2. **User Name** is your lab account, usually your name
  3. **Password** is your lab passwor, the same as your computer login
1. Profit! If everything worked fine, you should now see all your agendas in [Evolution](#), [Agenda...](#)
